## BOREHOLE DRILLING AND CLEANING

**Borehole Water Survey**  
**Spot Indication Only** **R2500.00**

Geophysical Groundwater Detector  
Detect Water Deposits Up to 850 m Depth

How deep is the water on my premises?  
The answer is here!!!

---

Water Survey With Depth Indication  
And Water Quality Indication R4500.00

*It also shows depth of water in metres and the amount of water in percentage.*

Sample water density and salinity in percentage		Sample quality of ground water found by the device	
WATER DENSITY	90 %	→ LINE A	FRESH WATER
WATER SALINITY	29 %	LINE B	FRESH WATER
DEPTH BETWEEN	350 400	LINE C	SALTY WATER
	B:99	LINE D	SALTY WATER
		LINE E	NORMAL WATER
		LINE F	NORMAL WATER
		OK FOR MORE	B:99

**WATER DEPTH 350 TO 400 (DEPTH OF UNDERGROUND RIVER =50METRES)**

BOREHOLE DRILLING AND CLEANING

## BOREHOLE PACKAGES

### 30M Hole Package

Drilling For 30M Hole =R10500.00  
6M Steel Casing =R3000.00  
0.37 Borehole Pump Installed =R8200.00  
Traveling Within 60km Radius =R2500.00

**Total Cost R24 200.00**

**Deposit R18 000.00**

### 60M Hole Package

Drilling For 60M Hole =R21000.00  
6M Steel Casing =R3000.00  
0.75 Borehole Pump Installed =R11120.00  
Traveling Within 60km Radius =R2500.00

**Total Cost R37 620.00**

**Deposit R25 000.00**

### 90M Hole Package

Drilling For 90M Hole =R31500.00  
1.1 Borehole Pump Installed =R13234.00  
6M Steel Casing =R3000.00  
Traveling Within 60km Radius =R2500.00

**Total Cost R50 234.00**

**Deposit R30 000.00**

### 120M Hole Package

Drilling For 120M Hole =R42000.00  
1.5 Borehole Pump Installed =R15835.00  
6M Steel Casing =R3000.00  
Traveling Within 60km Radius =R2500.00

**Total Cost R63 335.00**

**Deposit R40 000.00**

*ANY ADDITIONAL DRILLING IS R350.00 PER METRE.*

*ONLY 6M STEEL CASING IS INCLUDED AND ANY ADDITIONAL CASING WILL BE R500.00 PER METRE.*

*LOOSE TOP PART OF THE GROUND IS PROTECTED WITH STEEL CASING AND THE LENGTH OF THE CASING WILL BE DETERMINED BY THE CONDITION OF THE GROUND.*

#### General Borehole Drilling Facts to Take Note Of Are:

1. The exact depth, of where the water is located, cannot be established by the drilling contractor nor the water surveyor.
2. It is important to note that it is never a 100% guarantee that any hole will yield water, the amount and water quality can also not be guaranteed by the drilling contractor and water surveyor.
3. Making use of a hydrologist or traditional water diviner will increase your chances of having a successful borehole that will yield a sufficient amount of water.
4. The risk of the borehole drilling lies with the property owner. The client will still be liable for the drilling costs irrespective of a borehole yielding water or not.

A call out fee of R750.00 including one hour labor, will be charged per maintenance and will be paid in advance before the technicians are dispatched.

ABOVE IS JUST AN ESTIMATE NOT A QUOTATION.
